

## **CONSTRUCTION REPORT**

### **September 2014**

#### **Criminal Justice Institute**

Project to repurpose space for the Fire Academy is complete. The Certificate of Occupancy was issued on June 19, 2014.

The expansion of the thermal energy storage system was completed on August 20, 2014.

#### **East Campus – Film, Sound, Music Technology and Plant Operations Facility**

Design meetings continue to determine final building programs and the most appropriate layout. Skanska has been approved as the Construction Manager and is now fully engaged with the design team. It was determined that while it may cost a little more, it would be better to separate the academic functions from the facilities functions. A recommended solution will be taken to the Board of Trustees.

The new space is currently scheduled to open in the fall of 2016 and will be approximately 43,000 square feet.
