

College Data Team

November 28, 2012

2:00pm- 4:00pm

CJI Room 138

- We will discuss 4 main questions (and we will use the attached survey data in our conversation.)
 - How might we employ survey data in the decision-making process going forward? This will include a very concrete discussion of the current system - mechanisms in place - that could be used to do this systematically.
 - As you look at the draft "Presentation - QEP Survey" attachment -are there specific aspects that you find useful? Any particularly meaningful - and if so why?
 - How might you change / grow the "Four Questions for Discussion" included there on the second to last slide?
 - How might we design the survey data analysis and report so that it is meaningful and easily used?
