

**Report Name:** International Bachelor Application Report

**Location:** /Student/Program-Major-Degree

**Purpose:**

This report identifies international applicants for Bachelor programs and monitors their application progress, decision statuses, academic records, and transcript reception from other institutions. It extends existing reporting capabilities (ARG 075) with international-specific filters such as Citizenship and F-1 visa status.

**Description:**

This report is designed to support the processing of Bachelor applications submitted by international students. It tracks the receipt of college transcripts for a targeted group of applicants based on citizenship or F-1 visa status. Modeled after the existing ARG 075 Bachelor's report, this version extends its functionality by filtering records specifically for international student populations. The goal is to streamline transcript tracking and ensure timely processing for applicants with international status.
