Q13 - Describe aspects of this course that have promoted your learning and engagement in the course.

Response Rate: 93.75% (15 of 16)

1	how the course in laid out and organized.	
2	The videos linked in the course content are relevant to the online work so that helps	
3	The recommended homework questions strongly assisted in my understanding of the material.	
4	The professor is very open and available to help when needed.	
5		
6	The feedback	
7		
8	It is a hard course so you have to stay in the game and keep practicing to learn all the content.	
9	I really enjoy the videos in addition to the reading material. I feel like these support my visual learning process and it helps to see problems worked out.	
10	I like the wealth of resources that were made available. The sources for videos and written material were all pulled from a diversity of methods, and I found that to be very helpful in understanding certain problems or functions that appeared confusing at first. This class also taught me that even though online courses are relatively convenient for persons like myself, who work full time during normal class hours, online courses may not be 'enough' in terms of engagement. My upbringing is old school, so to speak; I've come to realize that I need in-person courses. Online is good enough for gathering material, but my engagement requires active interaction. However, I'm not discouraged, I'm determined to retake the course if necessary.	
11	I have learned in this course the more you put in the more you get out, This course has been very difficult but if you put in the time you'll reap the benefits.	
12		
13	Clear class plan and due dates. Very organized blackboard!	
14	Anything after Exam 2.	
15	A broad selection of material insures that i understand more than a narrow cross section of topics.	

Q14 - If asked whether you would recommend *this* course from *this* professor, what would you tell a friend and why?

Response Rate: 93.75% (15 of 16)

1	yes strongly recommend this course to others.	🔍
2		🔍
3		🔍
4	This course can be challenging if you don't keep up, especially since it's online. The professor makes things go along easier	🔍
5	Its online and well structured. My only complaint is that mini-quiz, homework, quiz, and practice problems all come from different websites and books. Consolidate please.	🔍
6	I would tell them to get ready for a full time commitment to get the grade you want in the class.	🔍
7	I would suggest my current teacher.	🔍
8	I would share with them what I said above: the course is great, and there is a lot to learn. However, they must be prepared for solo preparation and learning. The professor was always available, I must stress that. It's just that, if one needs to be 'in the mix' of a class, conversing and engaging in that manner, they may want to rethink taking this course purely online.	🔍
9	I would say this professor is a fair grader, however, I believe she puts a few unnecessary harder problems in the exams. I would not recommend this professor.	🔍
10		🔍
11	I would recommend this course, but warn that the tests are very hard and to reinforce the importance of studying harder problems.	🔍
12		🔍
13	I would not recommend his course to a friend. All of my previous math professors allowed a small note card that I was allowed to fill with notes for tests and quizzes, and this professor did not allow it. There were a lot of problems I got wrong because I couldn't remember one of the many formulas I needed to remember. I wasn't allowed to have my calculator for all of the test, which would have been useful to test my answers before I sent them to grade. The tests were always very difficult because of that, which counted for 50% of my grade. Overall, I don't think that the material I was given prepared me properly for the tests and I often had to search for outside sources to help make up for it. That, on top of no notes or calculator, made my experience with this course unpleasant. In real life, if I need to solve a problem, I'll use my calculator and notes/formulas; it's unrealistic to try and make us remember everything. More than anything, I don't feel prepared for the next level.	🔍
14	Clear class plan and due dates. Very organized blackboard, no clutter.	🔍
15	Cannot give a recommendation on my own merit due to this being an online course where little to now interaction was found between the professor and me (due to me not reaching out)	🔍
