

# Tools for Midterm Evaluations

## Designed by Faculty Members – Formative

September 10, 2012

Laura Blasi, Director, Institutional Assessment

**Qualtrics** [[www.qualtrics.com](http://www.qualtrics.com)] is an online tool available for survey development and administration at Valencia College. Qualtrics can be accessed through the link above and through ATLAS, on the lower left side of the page. This tool will allow you to run graphic displays of data – such as charts and graphs – which are handy for sharing information quickly. If you need help accessing Qualtrics, developing your surveys, or learning more from your results, please contact Laura Blasi ([lblasi@valenciacollege.edu](mailto:lblasi@valenciacollege.edu).)

**TOOFast** [[www.toofast.ca](http://www.toofast.ca)] TooFAST is an online assessment tool (available without charge) that is especially helpful for faculty members who want to develop their own midterm course evaluations towards their professional portfolios and for strengthening their courses. TooFAST allows multiple question formats and allows an unlimited number of surveys to be completed. The software automatically summarizes and consolidates the comments, in real-time, on the web. Results can be downloaded into Excel or a number of other formats.

### **STUDENT ASSESSMENT OF THEIR LEARNING GAINS (SALG)**

[[www.salgsite.org](http://www.salgsite.org)] With SALG you can gather results according to your learning objectives – this tool focuses on teaching and learning. There is also a large bank of questions that have been developed by other instructors. Using SALG you can measure students' learning gains in your course and their progress toward your course's learning goals.
