

## Accessibility Questions for Publishers & Web Developers

Valencia College's Office for Students with Disabilities recommends these questions be answered by publisher of textbooks & electronic materials to determine the Accessibility Compliance of materials being considered for use in Valencia College courses.

1. Are all videos captioned and are audio recordings transcribed?
2. Can all of the text that is displayed on the screen be read aloud by text-to-speech software?
3. Can all interactive activities be completed with the keyboard alone (no mouse required)?
4. Are any timers on assignments or assessments able to be reset by the instructor for individual students?
5. Do questions included in banks of faculty resources include markers to designate accessibility?

**NOTE: If the answer to any of these questions is "No", instructors may want to consider a different material.**
