### PLAN

#### 1. Goal

- **Goal**: principal purpose and objectives of plan (include how this relates to serving students or increasing student success or supporting LifeMap)

  Re-engineer the articulation process by creating better descriptors for the student transcript.

#### 2. Objectives

- **Objectives**: What will be accomplished and measured

  This plan will communicate progression towards degree requirements within an earlier time frame and allow students/advisors to aid students in planning for the future.

  System will allow paper to be processed into system immediately for viewing.

#### 3. Measures and Findings

- **Measures and Findings**: How specifically measures will be conducted. How will we know the objective has been achieved?

#### 4. Action Plan

- **Action Plan**: What is the implementation plan?

#### 5. Achievement Summary/Analysis

- **Better course descriptors were developed using extensive staff input.** Tech team worked on some of the reports/processes that used the old descriptors.
- **Work still has to be done programmatically with IT in order to move this process forward for the new year.**
- **Upon further research that was conducted by staff and management it was concluded that the amount of work needed for this rollout was more than could be done during a year’s timeframe. Further items were identified that needed to be implemented during the next year in order prior to initial rollout.**
  - **All catalogs need to be changed to look at the new descriptors.** We will seek assistance from IT in the coming year in order to aid with this process as manual work is not feasible for this piece of the project.
  - **Will identify all areas touched by the XFER process to be sure that all are modified before rolling out i.e. repeat process, workflow process of equivalencies/substitutions, etc.**

#### 6. General Education Learning Outcome

#### 7. Strategic Plan Outcome
