## Valencia College <br> Glossary of Terms Used in Institutional Research Reports

ACCOUNTABILITY REPORT - a process where data-based measures are used to provide information on institutional performance. Accountability Reports, published by the Florida Community Colleges and Technical Center Management and Information System (CCTCMIS), contain fall cohort benchmark measures calculated from data submitted by Florida State Colleges. These reports include prior year high school graduate enrollments, student retention and success, performance indicators for degree graduates who transfer to state universities by college prep and non-college prep, and vocational program placement

## AGE

- Mean Age - the age obtained by computing the arithmetic average of all the Valencia students' ages.
- Median Age - the $50^{\text {th }}$ percentile, obtained by creating a list of the ages of all the students in numerical order. The total number of students is divided by 2 . The resulting quantity (rounded up to the next integer value if necessary) will be called position $X$.
